Education

Sardar Vallabhbhai National Institute of Technology, Surat

Expected Jul 2028

Bachelor of Technology in Artificial Intelligence

CGPA: 8.92

Projects

Cloud-Native MLOps Pipeline for Machine Learning Deployment

🐙 GitHub

Technologies: Python, Flask, Docker, Kubernetes (Amazon EKS), AWS, GitHub Actions, MLflow, DVC, Prometheus, Grafana

- Built an end-to-end **MLOps pipeline** for **training**, **versioning**, and **deployment** of machine learning models.
- Developed a **Flask REST API**, containerized it with **Docker**, and deployed it on **Amazon EKS** using **Kubernetes**.
- Automated **CI/CD** using **GitHub Actions**, enabling seamless testing and deployment.
- Integrated **MLflow** and **DVC** for **experiment tracking**, **model versioning**, and reproducible ML workflows.
- Configured **Prometheus** and **Grafana** dashboards to monitor application health, Kubernetes metrics, and resource utilization.

Movie Recommendation System

🐙 GitHub

Technologies: Django, PostgreSQL, Python, HTML, CSS, JavaScript, TMDB API, OMDb API

- Developed a full-stack movie recommendation platform supporting **17,000+ movies** using **Django** and **PostgreSQL**.
- Designed a scalable backend integrating the **TMDB API** and **OMDb API** for automated metadata retrieval.
- Implemented a **cosine similarity** recommendation engine for personalized movie recommendations.
- Built responsive **search**, **filtering**, and recommendation interfaces with production-ready deployment.
- Optimized **database queries** and backend architecture to improve performance and maintainability.

Technical Skills

Languages: C++, Python, Java, SQL, JavaScript

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks

Frameworks & Tools: Django, Flask, Docker, Kubernetes, AWS, GitHub Actions, PostgreSQL, MLflow, DVC, Prometheus, Grafana, TensorFlow, OpenCV, Git, Linux

Technical Achievements

- Solved **200+ DSA problems** across LeetCode, GeeksforGeeks and Coding Ninjas.
- Built **cloud-native** machine learning applications using **Docker**, **Kubernetes**, and **AWS**.
- Strong understanding of **Operating Systems**, **DBMS**, **Computer Networks**, and **Object-Oriented Programming**.
